Summary

Data Analyst with **1+ year** of hands-on experience in **data analytics**, dashboard creation, and business intelligence. Proficient in **Python, Pandas, NumPy, Power BI, Tableau**, and **SQL**. Skilled in data wrangling, machine learning for classification and forecasting, and building insightful visualizations. Applied real-time data tracking and storytelling techniques to drive **data-backed** decisions. Adept in collaborative environments and mentoring others on analytics and technical skills. Seeking to contribute to data-driven projects that improve operational efficiency and business outcomes.

Technical Skills

Programming	: Python, JavaScript, SQL, TypeScript
Libraries/Frameworks	: Pandas, NumPy, Matplotlib, Seaborn, React.js, Node.js, Express.js, Django
Data Visualization	: Power BI, Tableau, Chart.js
Tools	: Git, GitHub, Streamlit, Jupyter, Excel
Concepts	: Data Cleaning, EDA, Machine Learning, Deep Learning, Predictive Modeling, REST API
Other	: Agile, SDLC, Project Management, Cloud Integration

Professional Skills

Familiar with Project Management, Technical Leadership, Mentoring & Training, Problem Solving, Software Development Lifecycle (SDLC)

Professional Experience

Ocean Academy — Data Analyst | Full Stack Developer / Trainer

September 2024 – Present

- Conducted training sessions on Python, Data Analytics, and Web Development.
- Built dashboards using Power BI and Tableau for business insights.
- Applied machine learning models for predictive analytics and classification.
- Ensured functionality, usability, and bug tracking across test cases.
- Guided students on full-stack applications using React, Node.js, MongoDB

Ocean Academy - (Internship) Software Developer / Trainer

March 2024 – August 2024, Puducherry, India

- Designed and developed web applications with React and Django frameworks.
- Integrated REST APIs and performed backend development with Node.js and Express.js.
- Collaborated with cross-functional teams to deploy scalable applications.
- Participated in code reviews and implemented performance optimizations.

Projects

MCQ Platform & Student Portal

- Engineered a scalable full stack MCQ platform using **React.js, Django REST Framework**, and **MongoDB** with secure JWT-based authentication.
- Integrated **Firebase** for real-time file storage and data synchronization.
- Optimized backend workflows and ensured high performance and data integrity in quiz evaluation.

TechFest Volunteer PWA

- Architected a **Progressive Web App (PWA)** using **Vite, React**, and **TypeScript** for live event volunteer coordination.
- Incorporated QR code scanning and live data capture to streamline attendance tracking.
- Enhanced mobile responsiveness and implemented robust error handling for field usability.

TechFest Admin Dashboard

- Developed a real-time analytics dashboard using **React.js, Node.js**, and **Chart.js** to visualize event participation and booking patterns.
- Built modular UI components and secured backend endpoints for seamless reporting.
- Enabled time-based filters and dynamic charts for actionable decision-making.

Texiclo Admin Panel (E-commerce)

- Implemented a modular **e-commerce admin interface** with **Redux** for scalable state management.
- Enforced secure role-based access and customized client-specific workflows.
- Structured frontend codebase using a feature-based architecture to boost maintainability.

TechFest Analytics Dashboard (Data Analyst Role)

- Processed and transformed event data using **Pandas** and **Excel** for reporting purposes.
- Designed interactive dashboards in **Tableau** to monitor registrations and attendance trends.
- Delivered insights that supported planning and resource distribution for a large-scale event.

Web Image Scraper (Streamlit + ML + Unsplash)

- Built an image scraping tool using **Streamlit** and **Machine Learning** that retrieves images from **Unsplash API** based on text input.
- Delivered a responsive frontend with real-time download functionality and image previews.

JOB-PORTAL,SFM & S.K.I.N Chat APP (Manual Tester Role)

- Executed comprehensive manual testing across modules involving **media uploads**, authentication, and **chat functionality**.
- Authored detailed test cases to validate UI/UX consistency, real-time messaging, and cross-device compatibility.
- Reported and tracked bugs using structured test logs, improving release quality and issue resolution time.

Education

Anna University

University College of Engineering - Villupuram

Bachelor of Engineering in ECE (C.G.P : 8.02)

2018 - 2022
